Description

Environment - Windows 10 Google Chrome Version 104.0.5112.81

Steps to reproduce:

1. Open <https://portal.bc.bulcode.com/>
2. Create a load previously
3. Click Loads on the left side of the page
4. Click My Loads
5. Click the three dots near the last load
6. Click Archive load
7. You will see the following question: Did you manage to find a partner for your load?
8. Click No

Expected result:

By clicking No, the user may expect that it will work as Cancel.

One may think that the system asks whether the user is sure he wants to archive the load. Maybe it is better to put the question about the partner in the previous step.

Actual result:

By clicking No the load goes to the archive.
